

COVID-19 Onsite Pre-Screening for Essential Service Workplaces

Looking to support employees during this time of uncertainty?

In the midst of the COVID-19 pandemic, Lifemark has been working to find ways to support your workplace, your employees and their families.

COVID-19 Onsite Pre-Screening includes:

- ✓ Registered Health Care Professionals on site to do temperature checks and pre-screen questionnaires
- ✓ Notification to the designated employer representative (i.e. Human Resources, Health & Safety and/or management) of those who screened positive for signs and/or symptoms based on Public Health Canada screening criteria
- ✓ Provision and education on next steps if they have screened positive as per Public Health Canada Guidelines
- ✓ PPE (surgical mask, gloves, sanitizer and thermometers must be provided by the worksite requesting the service)

Ensure that your employees are pre-screened by a medical professional to keep your employee and their co-workers safe.
